S E C R E T

SUBJECT: Weekly Report

5. Recent Phase I activities of the Field Acceptance Test and Cutover process for the MERCURY Packet Switch System included implementation and testing of the new configuration database. The new, larger database contains the associated profiles and configurations to allow OC and the Office of Information Technology to conduct operational testing of interfaces and functions in an environment which closely emulates that of the Agency's telecommunications network.

25X1

7. The final session of the Project GROOM managerial training courses for domestically assigned OC officers was completed during the reporting period. Project GROOM is a direct result of an Inspector General recommendation to provide this type of training to OC personnel and [ ] students have been trained in management styles and concepts by the GROOM team since February. Similar training for OC field officers will begin in September.
